

**Pumping Station (UPS20DA)**

Transfers solvent or water from one container to another. Flow control at receiving container. A versatile and reliable pump for any Print Shop.

**Ink Can Crusher (UCC840C)**

Crushes tins and most 5 gal pails, allowing the dumpster to hold more waste.

**Ink Can Cleaner (UPC3000)**

Ink cans are placed in the cabinet under the lid. Solvent is pumped from the pail through jets to clean the inside and outside of ink cans in less than 60 seconds.

Pail of Cleaning Solvent behind door

**UMW16AGS**

**34SL-42**

**Roller and Tray Cleaners**

Solvent flows through a flow-through brush and spigot to clean the rollers and trays.

Roller size      Model

32" or smaller    **UMW16AGS**

42" or smaller    **34SL-42** with built-in solvent recycler

55" or smaller    **34SL-55** with built-in solvent recycler

**Dual Diaphragm Pump**

Equipment is powered by a heavy duty Uni-ram Diaphragm Pump. Minimum air supply is 85 PSI.

**Pad Cleaner Station (UP7500)**

Solvent flows through the flow-through brush and spigot to clean the pads. Pads can also be placed in the cleaning tank for automatic cleaning.
