

PRESSURE SAND BLASTERS

BLAST AWAY

dirt, rust, paint and other unwanted deposits

Economical, U100-S

- Complete with 8 ft, 4 ply, heavy duty hose

U103-S

Complete with:

- 10 ft, 4 ply, heavy duty hose
- Moisture Filter
- Quick Disconnect Coupling for easy removal of hose from Sand Blaster

The Sand Blaster abrasive penetrates into the deepest pitted area to remove rust. Readies the surface for priming.

Ideal for use in refinishing vehicles, boats, monuments, brick buildings and industrial equipment.

Common Features:

- Portable
- Filling tank with abrasive is quick and easy
- Comes with Safety Shut - Off for operator safety
- Abrasive capacity about 100 lb

Safety shut - off

Common Features of Portable Pressure Sand Blasters

Built - In Funnel

Removable Filler Plug

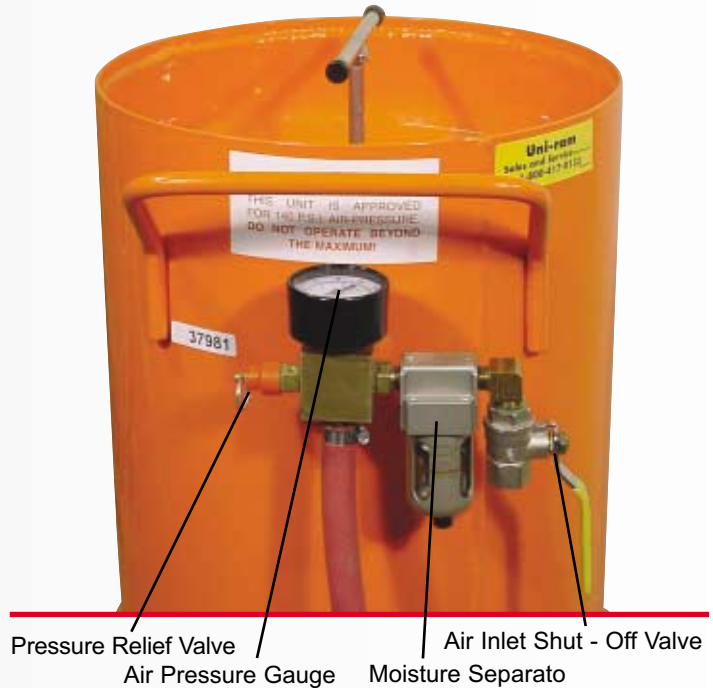

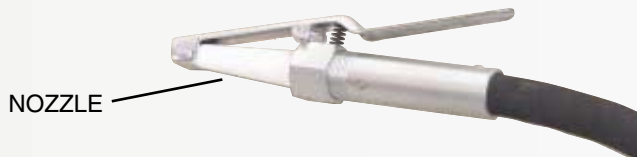

Filling tank with abrasive is quick and easy:

- Pour abrasive with ease into Built - In Funnel at top of tank.
- Return maintenance free filler plug and apply air pressure.

Abrasives include silica sand, glass beads, metal shot, aluminum oxide and nut shell.

Safety Shut - Off

Operation:

- Open Air Inlet Shut - Off Valve.
- Adjust Abrasive Control Valve.
- Squeeze Safety Shut - Off to activate flow of abrasive.

The Safety Shut - Off is an innovative Uni-ram design. Releasing lever terminates abrasive flow for operator safety. Safety Shut - Off is also known as "Safety Blast Hand Control" or "Squeezer Gun".

AIR AND SAND CONSUMPTION BY NOZZLE SIZE

Part No.	Inside Diameter (in)	Compressor (HP)	CFM@80 PSI	Abrasive Consumption (lb per hour)	Surface Blasting (sq ft per minute)
10-260	1/8	5	20	150 to 170	1 to 1.5
10-264	5/32	5	30	200 to 210	1.5 to 2.0
10-261	3/16	5~10	45	300 to 350	3.0 to 3.5
10-262	1/4	5~10	80	500 to 600	4.0 to 4.5
10-265	5/16	10~15	125	800 to 950	6.0 to 7.0

Unit comes with three 1/8" diameter ceramic nozzles. Other available nozzles are shown in chart above.
