

# PRESSURE BLASTERS

## BLAST AWAY

Dirt, Rust, Paint and Unwanted Deposits

The Blaster abrasive penetrates into the deepest pitted area to remove dirt, rust, paint and unwanted deposits. Readies the surface for priming. Ideal for refinishing vehicles, boats, monuments, brick buildings and industrial equipment.

### Common Features:

- Portable
- Filling tank is quick and easy. Abrasive is contained using filler plug.
- Includes Safety shutoff at nozzle for operator safety.

### Economical U100-S

Complete with 8 ft, 4 ply, heavy 4 ply 1/2" hose, clamped securely to Blast Gun.

Quick Disconnect Coupling

Safety Shut-Off

### U103-S

Complete with:

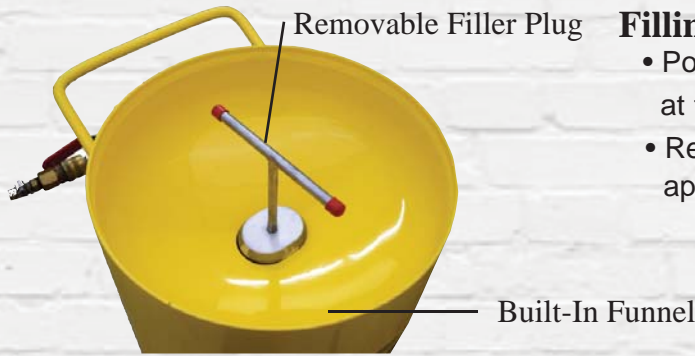

- 10 ft, 4 ply heavy duty 1/2" hose, pressure regulator, moisture filter, 3 seal blocks and 3 1/8" ceramic nozzles.

- Quick Disconnect Coupling for easy removal of hose from Blaster.

Before After Blasting, Ready For Priming

# COMMON FEATURES OF THE PRESSURE BLASTER

## Filling tank with Abrasive is quick and easy:

- Pour abrasive with ease into Built-In Funnel at top of tank.
- Return maintenance free Removable Filler Plug and apply air pressure.

## Operation:

- Open Air Inlet Shut-Off Valve.
- Adjust Abrasive Control Valve.
- Squeeze Safety Shut-Off Valve to activate flow of abrasive.

**Abrasive** includes silica, sand, glass beads, metal shot, aluminum oxide and nut shell.

## Blast Gun

The **Safety Shut-Off** is an innovative Uni-ram design. Releasing lever terminates abrasive flow for operator safety.

## AIR AND ABRASIVE CONSUMPTION BY NOZZLE INSIDE DIAMETER

Part Number	Nozzle Inside Dia. (in)	Compressor (hp)	CFM@80 PSI	Abrasive Consumption (lb/hr)	Surface Blasting (sq ft per minute)
10-268	3/32	5	7	80-100	0.5
10-260	1/8	10	20	150-170	1 to 1.5
10-264	5/32	10-15	30	200-210	1.5 to 2
10-261	3/16	20	45	300-350	3.0 to 3.5
10-262	1/4	20-25	80	500-600	4.0-4.5
10-265	5/16	25-30	125	800-950	6.0-7.0

Unit comes complete with 1/8" diameter ceramic nozzles. Other available nozzles are shown in chart above.
