## STATE-OF-THE ART SPRAY GUN CLEANER FOR WATERBORNE PAINTS

Manual and Automatic Cleaning

Red control handle operates pump to move the solution from the left pail into the flocculation tank, thus treating both pails

Manual Spray Out is accomplished here with Flow-Through Brush

Flocculation occurs in SS tank for 5 min after which the solution is drained through two filters

- Deluxe manual and automatic waterborne gun cleaner
- All stainless steel work area
- Two work stations, manual and automatic
- Two spray guns can be automatically cleaned in left tank
- Flow through brush supplied for manual cleaning

- Final manual clean rinse on right sink
- Blow gun and whip hose supplied for drying spray guns
- Solutions from both pails are treated and filtered in the right side flocculation tank
