

# UM80S

## WALL MOUNT SOLVENT SPRAY GUN CLEANER FOR MANUAL CLEANING

### CLEANING BECOMES FAST AND EASY

- Solvent under high pressure flows, at the press of a button, to thoroughly clean the paint passage in less than 30 seconds.
- The outside of the gun can be cleaned with a Flow-through Brush and dried with a Blow Gun (both included).
- Locating the compact UM80S inside the spray booth saves time because the gun can remain connected to the air line and the painter can remain in the booth; the paint channel is flushed while the paint is still "wet".
- For use with solvent based paints only.
- For use in the spray booth or in the general shop area.
- Ideal for cleaning PPS and other disposable cup adapters.

### FEATURES

- Cleaning tools - nozzle for cleaning paint passage, pad to clean cap, flow-through brush to clean exterior of gun and blow gun to dry paint passage and exterior.
- Non-corrosive stainless steel cleaning tank.
- Powered by Uni-ram's dual diaphragm pump.
